

Wingårdhs

We are a team of 215, with 130 in Gothenburg, 57 in Stockholm, and 23 in Malmö.

We are architects, construction engineers, interior designers, architects, landscape architects, 3D-artist, model builders, writers, and communicators.

Our work is rooted in the idea of
combining masterful architectural
execution with design that aspires
to the level of art.

Pianopaviljongen

The image shows a close-up, low-angle view of a wooden structure, likely a pavilion. The main focus is a large, curved wooden panel that forms part of the roof or a wall. This panel is perforated with a regular grid of small, circular holes. Sunlight filters through these holes, creating a pattern of bright, oval-shaped spots on the surface. The wood has a warm, light-brown tone. In the background, other wooden beams and panels are visible, suggesting a larger structure. The overall atmosphere is bright and airy.

Vasaplan

A night-time photograph of a modern urban street. The scene is dominated by a long, covered sidewalk on the right side, featuring a wooden canopy structure with horizontal slats. The canopy is illuminated from within, casting a warm, orange glow. The sidewalk is paved with light-colored tiles and has a tactile paving strip running along its edge. To the left of the sidewalk is a dark asphalt road. In the distance, a car's headlights are visible, and the street is lit by various streetlights and building lights. The overall atmosphere is modern and well-lit.

Jönköpings station

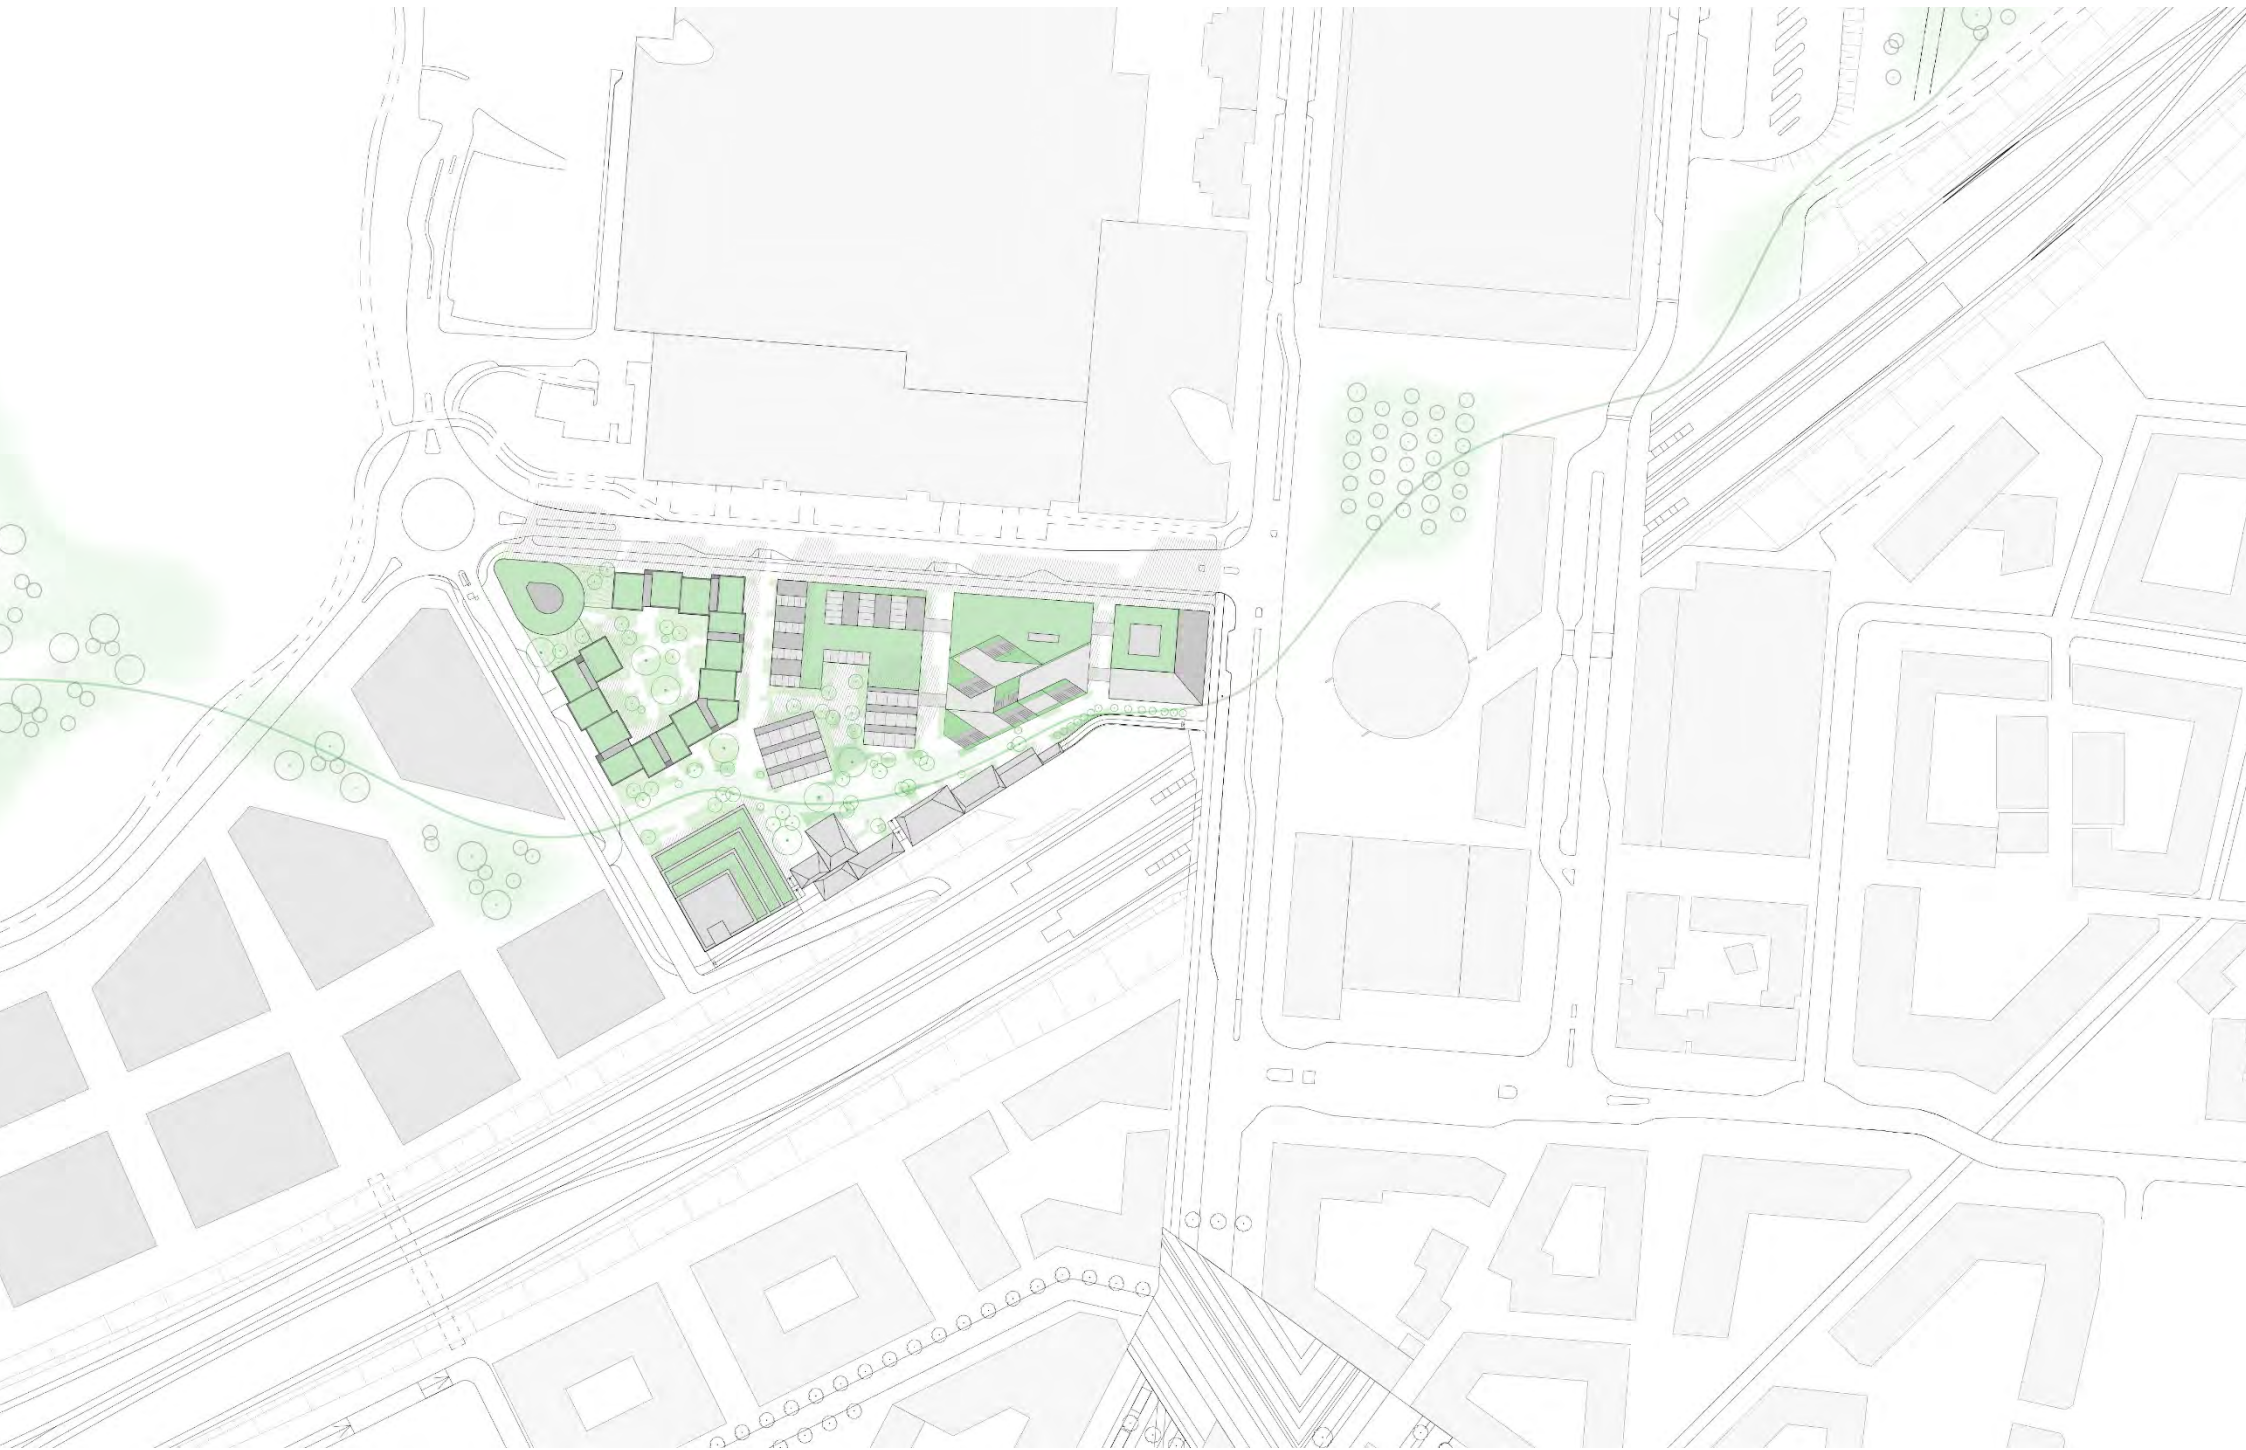

An aerial architectural rendering of a modern urban development. The scene features several multi-story buildings with green facades and solar panels on their roofs. A central park area is filled with trees and greenery. In the foreground, there's a large, curved structure with a red border, possibly a walkway or a public space. The overall design emphasizes sustainability and community sharing.
